**Summary of reasons
for classification:**

The DVD *Haute Tension* is classified as:

Objectionable except if the availability of the publication is restricted to persons who have attained the age of 18 years.

The DVD contains a feature previously examined and classified by the Office of Film and Literature Classification. The original feature was classified as "Objectionable except if the availability of the publication is restricted to persons who have attained the age of 18 years", with the descriptive note "Contains horror, violence, sex scenes and offensive language" (OFLC No.500142). This decision was registered on 23 February 2005. Apart from some extra notices at the start of the feature under consideration both features are identical.

Extra components on the DVD include stills, notices, trailers and two detailed components related to the feature. The additional material includes the depiction of crime, horror, sex, violence and cruelty, the strongest of which are scenes repeated from the feature. The additional components are of a similar nature to the feature and therefore do not require any change to the original classification.
